TESTIMONIAL FROM A FARMER WITH REGARD TO A MAJOR SOIL PRESERVATION INNOVATION

SŁOWO WSTĘPU

A farm with multiple crops requiring a high level of maintenance, lots of vehicle traffic and high-tech equipment.
The major constraint: frequent changes in inflation pressure between the road and the fields.

DOŚWIADCZENIE W PRAKTYCE

Opinia dotycząca stwierdzonych zalet opon VF VT-Tractor:

- “Comfort and 10/15 minutes saved each time: by pushing one button the 4 wheels are inflated at the same time without having to get out of the tractor cab.”
- “Preserving the structure of the soil: with low pressure in the fields, the structure of the soil is protected, the slip ratio lowered and therefore fuel consumption reduced.”
- “Reduction in fuel consumption: with a low inflation pressure in the fields which reduces slip.”
